Skills

- Next JS/TypeScript
- MERN Stack
- Redux/React Toolkit
- HTML/CSS/JavaScript
- Chakra UI/Material UI
- Tailwind CSS
- UI/UX

Soft Skills

- Emotional Intelligence
- Communication Skills
- Time Management
- Teamwork

Maryam Naveed

Associate Software Engineer

As a motivated individual in Computer Science, I have acquired valuable knowledge and skills in MERN Stack and NextJS/TypeScript. Through creating dynamic and responsive solutions, I have honed my abilities in web development. I possess strong understanding which enables me to adapt quickly to new technologies and programming languages. Collaboration and clear communication are among my strengths, and I thrive on challenges, constantly seeking opportunities to expand my knowledge and skill set.

Experience

Associate Software Engineer

Moshpit Studios, Lahore

August 2023 - Present

Responsible for translating design concepts into efficient, visually appealing, and interactive webpages using Next.js/TypeScript, with expertise in API integration and backend development. Working closely with UI/UX cross-functional teams, contributing to creating seamless user experiences.

Education

COMSATS University, Lahore

BS Computer Science

September 2019 - July 2023

Projects

Project Management Tool

<https://github.com/mareyam/project-management-tool>

- Developed a fullstack project management web application using NextJS/TypeScript
- Added user authentication and authorization for restricted access.
- Managing users, setting deadlines, scheduling tasks and projects, maintaining robust user experience

E-commerce FullStack Web Application in Next JS

<https://github.com/mareyam/next-e-commerce>

- Developed user-friendly and responsive e-commerce web application using NextJS and Chakra UI with dynamic product catalog, cart, and checkout features

Influencer Marketing and Sentiment Analysis Web Application

<https://github.com/mareyam/influencer-marketing>

- Developed and Designed a dynamic website using React/Figma and Django to facilitate promotion of brands using Influencers on social media.
- Developed schema, business operations and database using Django on the server side.
- Set up RESTful APIs for data exchange between React and Django.
- Integrated Reddit and Instagram APIs to fetch dynamic data for the system
